

Conference, conscience and climate: Take right

Author(s):	Montgomery H

Journal:	Heart (British Cardiac Society). 99 (1): 13-14

Abstract:

Climate change poses a clear, grave and immediate threat to human health and survival. We all have a responsibility to act, and to act fast. What actions each individual takes will depend upon their own lifestyles and what is "most amenable to impact" - an issue readily resolved by use of an online carbon calculator. However, limiting travel to international conferences seems both sensible and feasible. Doing so may benefit our pockets and those of our societies, while enriching our lives. But one thing is clear. It will save lives.

Resource Description

Communication: ☒

resource focus on research or methods on how to communicate or frame issues on climate change; surveys of attitudes, knowledge, beliefs about climate change

A focus of content

Communication Audience: ☒

audience to whom the resource is directed

Researcher

Exposure : ☒

weather or climate related pathway by which climate change affects health

Unspecified Exposure

Geographic Feature: ☒

resource focuses on specific type of geography

None or Unspecified

Geographic Location: ☒

resource focuses on specific location

Global or Unspecified

Climate Change and Human Health Literature Portal

Health Impact:

specification of health effect or disease related to climate change exposure

General Health Impact

Mitigation/Adaptation:

mitigation or adaptation strategy is a focus of resource

Mitigation

Resource Type:

format or standard characteristic of resource

Policy/Opinion

Timescale:

time period studied

Time Scale Unspecified
